The conference will address different categories inside the Psychology area and papers are expected to fit broadly - but not exclusively - into one of the named themes and sub-themes:

**CLINICAL PSYCHOLOGY:** Emotions and related psychological processes ■ Assessment ■ Psychotherapy and counseling ■ Addictive behaviors ■ Eating disorders ■ Personality disorders ■ Quality of life and mental health ■ Communication within relationships ■ Services of mental health ■ Psychopathology.

**EDUCATIONAL PSYCHOLOGY:** Language and cognitive processes ■ School environment and childhood disorders ■ Parenting and parenting related processes ■ Learning and technology ■ Psychology in schools ■ Intelligence and creativity ■ Motivation in classroom ■ Perspectives on teaching ■ Assessment and evaluation ■ Individual differences in learning.

**SOCIAL PSYCHOLOGY:** Cross-cultural dimensions of mental disorders ■ Employment issues and training ■ Organizational psychology ■ Psychology in politics and international issues ■ Social factors in adolescence and its development ■ Social anxiety and self-esteem ■ Immigration and social policy ■ Self-efficacy and identity development ■ Parenting and social support ■ Addiction and stigmatization ■ Psychological and social impact of virtual networks.

**LEGAL PSYCHOLOGY:** Violence and trauma ■ Mass-media and aggression ■ Intra-familial violence ■ Juvenile delinquency ■ Aggressive behavior in childhood ■ Internet offending ■ Working with crime perpetrators ■ Forensic psychology ■ Violent risk assessment ■ Law enforcement and stress.

**COGNITIVE AND EXPERIMENTAL PSYCHOLOGY:** Perception, memory and attention ■ Decision making and problem-solving ■ Concept formation, reasoning and judgment ■ Language processing ■ Learning skills and education ■ Cognitive Neuroscience ■ Computer analogies and information processing (Artificial Intelligence and computer simulations) ■ Social and cultural factors in the cognitive approach ■ Experimental methods, research and statistics ■ Biopsychology.

**ENVIRONMENTAL PSYCHOLOGY:** Environmental behaviour studies ■ Place attachment ■ Restorative environments ■ Pro-environmental behaviour ■ Architectural psychology ■ Environment psychology theories and methods ■ Environmental risk perception and management ■ Environmental impact assessment ■ Environmental consciousness ■ Interdisciplinary research.

**HEALTH PSYCHOLOGY:** Biological, physiological and cognitive methods ■ Research methods and measurement ■ Individual differences and habits ■ Illness-related and sick role beliefs ■ Acute and chronic illness ■ Dealing with pain ■ Health promotion and intervention.

**PSYCHOANALYSIS AND PSYCHOANALYTICAL PSYCHOTHERAPY:** Psychoanalysis and psychology ■ The unconscious ■ The Oedipus complex ■ Psychoanalysis of children ■ Pathological mourning ■ Addictive personalities ■ Borderline organizations ■ Narcissistic personalities ■ Anxiety and phobias ■ Psychosis ■ Neuropsychology.
